

## GroupCalendar for Notes

Collects appointments, meetings, events, To Do's and resource reservations. Items are displayed in a separate Calendar database.

- No additional software on the server, no extra DLL's or EXE's.
- Support BlackBerry (Java).
- Use the option 'Mark Private' to hide details.
- Calendar Items are collected as a scheduled server task.
- Install as many GroupCalendar databases as needed.
- Licensed by the user, and easy to install.

for a free evaluation version.

The evaluation version is the full version of the software, valid for 45 days.

## RepCAT for Notes

Pro-actively monitor your clusters or replicated servers with RepCAT, the replication cluster analyzer tool. RepCAT takes care of creating replica's on all servers, to make sure that all databases are available on the failover servers. RepCAT creates an instant overview telling you which databases are not in sync.

- Choosing for RepCAT means saving time. What used to take hours, now takes minutes.
- Open RepCAT and see how your Cluster is doing. No console commands necessary.
- Licensing is a fixed price per organization.

## WorkplaceControl for Notes

Offers the ultimate out of the box solution for centralized management of the Lotus Notes Client. Save time and money on:

- Migrations
- Consolidations
- Upgrades
- Configuring new installations
- Troubleshooting clients

WorkplaceControl takes care of any project concerning the Lotus Notes Client!

## How does it work?

WorkplaceControl distributes client changes by e-mail. The user simply opens the e-mail and new settings are a fact.

Auto-execution is also supported.

## Reporting

WorkplaceControl returns logging of the progress and results of the actions. A special repository database provides a clear overview of all actions and their statuses.

## Powerful features

- Perform client and server side modifications.
- Manage Lotus Notes client settings such as connections & locations, remove/add/switch icons & bookmarks, replicator page, ACL/ECL/INI settings, encrypt local databases, user & mail preferences, search & retrieve files and much more!
- Audit Lotus Notes client settings, OS & hardware resources.
- Extensible with personal scripts.
- Support off-line users.
- Support multiple languages.
- Operating system independent.
- Works with all Lotus Notes versions supported by IBM.
- Certified since 1998 as 'Runs with Lotus Notes' and 'Runs with Lotus Domino'.
- No software installation on the desktop needed.
- Detailed context sensitive help.

## Evaluation, Support & Licensing

- Licensing is based on the total number of Lotus Notes users.
- Minimum license 100 users. Enterprise license as off 25.000 users.
- Free maintenance during the first year. Renewal costs 15% of the current license price.
- Full technical specifications available on the website.
- Need for a special action? Please contact us.
- Support is included during the evaluation and maintenance period.
